# Outsourcing Testing Services - the Right Way

Mar 21, 2017–Mar 22, 2017

Outsourcing testing services delivers faster and better results than using internal company resources does - that's the expectation. In reality, this is possible but it's definitely not always the case. As experienced test service providers, we will, in this webinar, show the prerequisites that need to be in place in order for outsourcing of testing services to be successful. As part of this, we will introduce different concepts for productive collaboration and the opportunities customers have to evaluate the progress of the project and the results.

The webinar will take place on two alternative dates in English:
