

# MES Webinar Series

We will be continuing our successfully launched MES Webinar series. In each series, we will inform you about tools, applications, and concepts to optimize model-based software development and give you the chance to exchange ideas with our experts.

**Participation in our webinars is of course free of charge. Webinars are held in English (unless otherwise stated).**

## On Demand Webinars

You can find a selection of webinar recordings here.

# Test Automation Made Easy

Feb 11, 2020

In software development, it is important to know the exact quality of the defined software version. Efficient and comprehensive quality assurance in the form of software tests is therefore imperative. Due to the increasing importance of methods such as Scrum and Extreme Programming in software development, an efficient test development process becomes more and more important. Some test management tools already provide a high degree of automation in the form of automatically generated test sequences, evaluation routines, and batch configurations. However, with version control systems and continuous integration tools, it is possible to further expand automation and preserve valuable resources for other processes.

This webinar focuses on approaches to test automation with Jenkins and Gitlab. The webinar also demonstrates how test runs can be started not only by developers or testers but also by means of well-defined keywords, when checking new versions or creating merge requests.

The webinar will take place in English:

## Tuesday, February 11, 2020

Time: 4 pm CET (Berlin)/ 10 am EST (Detroit)/ 8:30 pm IST (Bangalore)/ 11 pm CST (Beijing)/ 12 am JST (Tokyo)

Registration: <https://model-engineers-event-en.webex.com/model-engineers-event-en/onstage/g.php?MTID=e0870e3a8ab6b5976c3e2813402936f23>
