- ISO 26262

MXAM Tool FAQ

Questions asked by users

- How can I start an analysis?
- How can I handle the different views in the report perspective?
- How can I repair guideline violations?
- How can I justify guideline violations?
- How can I save my report?
- Why do I not see the MXAM Report Adapter in the Artifacts Wizard?
- How can I select the reports that I want to compare?

Questions asked by quality/project managers

- How can I setup and configure a new MXAM project?
- How can I customize the check behavior?
- How can I ignore elements and exclude them from being analyzed?
- How can I create a customized guideline document?

Questions asked by tool chain managers

What are the system requirements to run MXAM?

How can I install MXAM?

How can I setup the license?

How can I automate an analysis?

How can I execute custom code during an analysis in MATLAB?

Questions asked by check developers

How can I implement custom checks?
